

Stringent & Strategic Identity Management

Leverage tailored solutions to enhance security and streamline access management.

Our Approach

We provide support from start to finish, helping you plan, implement and optimize to deliver security solutions that best fits your evolving business needs.

Common Challenges

- Manual identity and access management increases operational overhead and cybersecurity risk
- Lack of entitlement management capabilities leads to privilege sprawl, increasing risk of unauthorized access
- Securing authentication across complex application environments
- Privileged systems and application access is not managed and monitored effectively across all access points

What's Included

- ✓ Establishment and optimization of Identity Governance and Administration program
- ✓ Identity lifecycle dynamic management (ILDM) – Automated provisioning, maintenance and de-provisioning of identities across enterprise systems
- ✓ Entitlement management including role-based access controls, automated requests and access provisioning
- ✓ Centralized Single Sign-On Authentication across Enterprise Applications
- ✓ Privileged Access Management (PAM)

Service Options

- Identity Governance and Administration (IGA) program and strategy
- Identity lifecycle management implementation and automation
- Entitlement management implementation and automation
- Privileged Access Management implementation

Why iVision?

People

We promote productivity and collaboration through proactive management, clear expectations and technical expertise.

Process

Our structured and repeatable approach is based on strategic methodology that allows you to capitalize on opportunity.

Technology

Our proven partner ecosystem empowers us to deliver the most innovative solutions for your technology needs.
